Cleaning and storage:

The **niroflex 2000** safety gloves are to be cleaned with hot water (50 C) and a standard detergent used in the meat and food industry immediately after use. Finally, always rinse with clear hot water (approx. 85 C). After drying the **niroflex 2000** glove should be sprayed with a disinfectant used in the food and meat industry. Allow the disinfectant to react for several minutes. Do not use detergents which contain acid and/or chlorine.

The **niroflex 2000** gloves are heat-resistant, up to at least 120 C
